## EDUCATION

**VNR Vignana Jyothi Institute of Engineering and Technology**

Oct 2023 - Present

*BTech in Computer Science and Engineering*

*CGPA - 8.18*

**Government Institute of Electronics**

Jun 2020 - Oct 2023

*Diploma in Computer Science*

*CGPA - 8.99*

## SKILLS

**Languages:** C/C++, Python, Java

**Full Stack Development:** HTML, CSS, Javascript, ReactJs, NodeJs, ExpressJs

**Tools:** Git/GitHub, Netbeans, VS Code, IntelliJ PyCharm/IDEA, Jupyter Notebook

**Database:** MySQL, PostgreSQL

## EXPERIENCE

**Industrial Training | NSIC**

December 2022 - May 2023

- Worked on SAM - The Library Management System in Python.
- This Library Management System allows book management, member registration, book issuing and returns, and database integration using MySQL for efficient data handling.
- Gained hands-on experience in Python, Pycharm IDE, Git, Github, MySQL

## PROJECTS

**Urban - Hero |** *React.js, Node.js, Express.js, Firebase, Google Maps API*

December 2024

- Urban Hero is a web application built with React to enhance urban safety through real-time incident reporting and community collaboration.
- It features an interactive map interface for visualizing reported incidents.
- Developed using React.js with backend support (Node.js/Express.js) for efficient data handling and API integrations.

**Power Track |** *C++, Wokwi, Blynk*

January 2024

- Smart Electricity Management System – This project monitors and optimizes power consumption using an ESP32, helping to reduce energy waste and improve efficiency.
- Blynk Cloud Integration – Real-time energy usage data is sent to Blynk Cloud, allowing remote monitoring and control through the Blynk app.
- Wokwi Simulation – The project was designed and tested using Wokwi, a virtual simulator for embedded systems.

**Airline Reservation System |** *Java, Swing, JDBC, MySQL, Database, GitHub, Eclipse IDE*

December 2023

- Implemented a user-friendly GUI (Swing, AWT) for efficient interaction.
- Optimized database queries for efficient search and reservation management.
- Ensured data integrity and security through proper **CRUD** operations (Create, Read, Update, Delete).

## CERTIFICATIONS

- Completed Full stack Web Development from Udemy
- Completed Java, Python Certification in NSIC.
- Completed Big Data Certification from Samsung Innovation Campus.
- Completed AI/ML for Geodata Analysis from ISRO.

## ACHIEVEMENTS

- Won First Place in Map-An-App Hackathon in VNR VJIET.
- Engaged in the Finale of Innovasia Hackathon 2024, standing out among 180+ competing teams.
